Just a quick note to express my gratitude for a job well done.

As a 10 year, only owner of this house, and having been here since we broke ground, I was confident I knew all the issues confronting this dwelling.

Much to my surprise. Jack found over a dozen things that I didn't even know existed. Some of them (the electrical ones) could pose real potential danger to my grand-children. Some of the others could result in structural damage, over time.

It is SO NICE to be able to sell this house with a CLEAR CONSCIENCE. I'm confident, that all issues are known, and disclosed prior to sale!

Not only was Jack professional and effective, but he was also personable. Such is often-time the case, with a person who loves his job, which Jack very much does!

In closing, let me just say that I'm going to be hiring Visiontech to inspect the house I'm having built, prior to my 1 year walk through. It'd would be so good to know any issues, prior to them expiring from my Home Owners Warranty!

Kudos to Jack and his (cute) wife Elizabeth, on a job well done! What a

team!

Oh, we'll be in touch... for sure!

Thanks!
